The latter group will normally write one-liners without any specific details, normally just informing other shoppers that it's "safe" to order from

this specific account and that it's not a scam of some sorts. However, once you see reviews of the first two groups that are only a few words long, you'll

be better off taking a closer look as they might be fake reviews: When looking at reviews, you have the option at the bottom to either communicate that this review was "Helpful" or that you want to "Report abuse".

When you're defending yourself against fake negative reviews on Amazon as a seller, we strongly suggest that you write an email instead of simply reporting the abuse. Of course, you'll need to build a stronger case if you want it to

be successful. Here's how you do it:

At a first glance, you may connect bad reviews on Amazon with negative consequences for your business. Yet, don't feel tempted to get rid of all negative feedback but try to learn from it instead. Especially detailed reviews may serve as a golden source of information. For instance, some reviews may indicate that the product's description is not precise enough and, therefore, should be optimized. Using high-quality 360-degree photos could also help to prevent or at least minimize unfulfilled customers' expectations. In some cases, however, reviews provide evidence of insufficient product quality a sign for the seller to take steps to improve it.
