Soon, Massachusetts will make Nevadans jealous over their access to remote regi  
stration for online sports betting.

However, Massachusetts betting sites may not come online until March.

The fake review spotter posed security risks, Amazon said.

Fakespot, an app that analyzes Amazon reviews to determine which ones are fake,

is no longer available for iOS. Amazon has successfully convinced Apple to remov

e it from the App Store after the company raised concerns that the application p

rovides misleading information and creates potential security vulnerabilities. T

he e-commerce giant has confirmed to Engadget that it reported Fakespot for inve

stigation. One of its biggest concerns, Amazon told us, was that the redesigned

app Fakespot launched in June "wraps" and injects code into its websit
